Zamboanga City, Philippines

Earth is made by God. We should love it and care for it, like the way He cared and love us. Earth is the most important to us, because if there is no home to live. Earth is just like our home. We need to keep it clean and take good care of it also.

There are a lot of things that we should do and to avoid in order for us to save the earth. One is saving the nature, by simply avoid cutting the trees to avoid landslides. Recycling some materials and throwing the garbage in the proper way. Throwing the garbage in the river can cause bad air for us to smell. We can't smell anymore fresh air because of the garbage that is thrown in the river. Throwing also garbage in the canal is not the proper war for throwing the garbage. If we throw some things there the water will not flow directly because of the garbage that we throw there. Also the water will get stock and over flow in our way because of the garbage.

To save the earth is easy to say. But it's the hardest thing to do. Take good care of the nature, environment to save the earth. Love and save the earth.
