How to Save Our Environment

Aisha S. Tarang
Certificate in Respiratory Therapy
School of Allied and Medicine
Universidad de Zamboanga

Reduce, re-use, and recycle. By reducing the use of plastic bags, we can save our environment, by preventing the burning of plastic bags and re-using it. So we can use it again and recycle it. We must also prevent illegal logging to save our trees. Instead, we must plant trees to prevent flash floods, landslides that destroy mother earth.
