HUMAN RIGHTS IN POLITICS

Maricar Magura

College of Business Management
Universidad de Zamboanga
Zamboanga City, Philippines

This time in our country even to the other country they are experiencing such abuse of human rights. Human rights such as the right to live peacefully, right to educate, right to work, right to speak of your own, right to choose.

With this, every time that we have an election many rights violate because of the people. Trying to get power in government so that they can control their barangays or municipality. To get the power they do some bad doings like vote buying or else they use human force to force the voters to vote that person or party in a municipality.
