Each and everyone’s cries out for a world peace! Which meant a nation is free from a state of hostility, conflict or should I say no struggles harm of mankind. Can we imagine how wonderful life would be if there a state of calm and quiet, the earth with its inhabitant have; but still we suffer from bounds of warfare, instance of distress etc.

I believe that we can make this through, its never too late for all of us, from all walks of life and in different struggle to join together to develop a shared visualization of our world united in peace, harmony responsible freedom we must project a bold vision of a world where valuable resources are no longer misspent on the instrument of death and destruction but are creatively tied together for economic development and opportunity. Let us challenge ourselves to stand for a dignified cause, and I will call for peace! If we call for peace start o establish to change for good, and vision for better tomorrow.
