

A Dream of A World

吳凱文

I have a dream. A dream of a world can be more prosperous and our life more convenient.

But, however, we have simply forgotten how our environment felt, with our world is getting more and more developed, our environment is getting more and more polluted at the same time. Rivers are been intoxicated and streets are been littered at random.

Since it is impossible to turn it's original form right away, at least we can do is reduce the amount of waste. Personally, I usually pick up the trash whenever I go or collect waste papers for recycling. As for saving energy, I turn off the lights and facets constanly, in order to reduce the comsuming of resources around us. As a teenager, there are not many big things that I can do to safe our environment, but what I said above is not only me but everyone can must do and make our environment better.

Making a balance with the ecosystem wasn't easy, even though we have tried our best, but don't give up everyone ! We will make our environment cleaner !
