Article Title: Protecting Mother Earth

I can protect Mother Earth in my own simple ways by being a disciplined person. I have to be concerned in what was happening in our environment besides. It won't seem for the good of just a single person but the whole human being and all the living things. I should segregate my garbage and properly and throw it in the right place. And in my free time when in my home I can even plant trees. Because I believe that simple things can make a big difference.
