ENVIRONMENTAL SOLUTION

By: **Omar Khan Yahiya**, AE Memorial Science High School
Zamboanga City, Philippines

Our environment suffers from our pollution, waste, and consumerism. We constantly take and seldom give back to our Mother Earth. We can invite others to consider the amount of waste and environmental impact we place on our planet. This can be done through awareness raising, political advocacy, or systemic change. We have a unique gift and talent for this. We are people of the earth; we are in relationship with all creations. As a person living inside mother earth, we too can nurture these relationships in all creations.

"The Law of Attraction attracts to you everything you need, according to the nature of your thought. Your environment and financial condition are the perfect reflection of your habitual thinking. Thought rules the world." - Dr. Joseph Edward Murphy.
