

See the True Meaning of Life, and Everyone Can Save the Earth

Fusheng / Ana Ruth R. Ygrubay

While in watching the film, $\pm 2^{\circ}\text{C}$, I feel so sad, thinking that people are too careless about our environment. As for my own opinion, if we can protect the environment, we can protect ourselves too by helping each other to save the earth. Floods, earthquakes, storms are just only the trials that were given to us in the film, we never know what's going to happen next. If we can only see the true meaning of life, I believe everyone can save the earth. I hope this will not happen the next generation so that we can leave our children a good nature.
