

The Importance of Environmental Protection

Help!

This article I'm going to write is going to focus on environmental protection and the reason why it should be maintained.

The earth is our home. It is the home, not only of us and our family and our friends, but of the human race as well; moreover, the home of every living creature and organism. The earth supplies us with resources for fun and excitement, as well as tools for basic survival, food, shelter, even Chinese Folks Arts Camp here in Sunnyvale.

But for all its worth, I don't believe we are displaying our gratitude properly. Why is there so much litter and waste anywhere we go? Why is global warming continuing and why are we keeping on polluting the world so much? Why are we robbing so much of our planet's resources and abusing that share?

We cannot litter. We cannot waste. We have to protect the environment!
