

RELATIONSHIP EMPLOYERS WITH WORKER AS A HOUSEMIDE

My name is SITI INDASAH. I'm work as a housemide in Taiwan and take care older's people and I work in here more than 6 years. I am thinking an what I feel and what I know relation betwin imployer and mide will be a good and can take so long times if:

1. OWNEST

Workers/ mide must be ownest this is the most importen thing because this is the first thing to start to work with other people it not nobody will use blafing people, we ownest in the talk and ownest in the what we doing. Employers must ownest to if she feel she's mide not very well in the work imployer just tell the mide so she can cange and can do work very well but don't tell in the back's mide or to other's people because that will make workers unhappy and make worker hart pine.

2. WORK WITH HART

Working with the hole hart will make happy iven that work very hard she can feel easy but if not even that work very easy she will feel it's to hard work.

3. OPEN

Same time's mide (worker) got problem with other's people or she's family in she's country. So she need to talk to other to share what happen or what the problem she has for me if got problem place to share my problem is my lady boss. Whe she geting free even she want to know or she just to listen and than I will share with her. So my hart get more well but same time my boss will fine the true solusion, because when I got problem my brains can not thinking very well. So I need other's people to share. Because worker (mide) no relative in other country so imployer's is the true place to share because we sray together.

4. TAKE CARE AND LOOK AFTER

Worker's (mide) must take care and look after the imployer's hole family so imployer can to do like that to worker (mide) on healty and iven on food and what ever.

5. It between imployer and worker's (mide) know each other and worker's (mide) know what have to do and imployer never give worker (mide) over work until worker (mide) feel time to vest not enough that will good forever like one family, so worker's (mide) can feel have to protect everything in the house so imployer can feel easy when they are going out/ going to work because they feel at home get samebody prote and take care they are's thing.

6. Employer give all the thing what worker's (mide) have to receive ex: salary and prevasi person. So worker's (mide) feel live in other country (Taiwan) like live in ownes country (indonesia) or live in imployer's hause like live in ownes hause.

7. Maines (RESPEC EACH OTHER)

We must respect to other people weather he is more younger than us. Get one owrth: Before you want people respect on you. You must respect on other people. So we are will get respect from other people when we are maines (Respec) other people to. In Taiwan so many worker as hause mide ascape to be illegal person because so many thing ex:

1. get bad imployer

imployer same time beting the mide, sleping made or more than wars and agen don't want to know or they are know but they ask to mide just to paissen. So the mide can not stand any more and she don't know any place to share, so she (mide) want ascape.

2. Imployer never give salary/ they give but just little bit and the rest imployer keep. Ecely mide same time she want to buy same thing and she don't want to late boss know it because she feel afraid if boss know it they will gat scaueding, ifven that thing is for herself or for other people.

3. worker (mide) goting blafing with Agen. Because agen cut/ didact salary to much not the true rule form government so worker (mide) feel so sad and she cliel not know how to repot to counseling center.

4. worker getting blafing with other people if work at out side salary get more much than now and she never thinking if ascape to be gal is more dangerous.

5. worker get bad inisidtif from other people so she want to give up fram this work because she feel that's work is not pervec for her so she want to fine more good than that's work.

From all I right is all clipen from karakter's people even that is caracter's mide as worker or imployer. If fram the start that's people caracter is good that people can to be a good people bad it from start that's people caractoer is bad that people can to be bad people but also can to be a good people is digicult if from them's self not want change to be a good people.
