

Meaning of Life

You were created in this world for one purpose. To try and make a difference in the world. Love is what we people need. Love is not something that you're born with; it's something that comes once in a while. And it's the closest thing we have to magic.

The Earth will receive peace when everyone has a part of love. The Love of Jesus, family, friends, & most importantly yourself. There is a purpose & a destiny for all of us!
