

We Can All Do Our Part to Save the Earth!

by Emily McNally
Mound Elementary School
Ventura, CA

The Earth is our only home. We have to save the planet or it will become like the movie Wall-E which is a landfill and unlivable for humans.

We should not create as much waste which goes into the ocean and landfills.

Here are some simple steps to saving the Planet:

1. Don't buy as many juice boxes and water bottles. Instead, use reusable containers and make your own fresh squeezed juices.
2. When you go shopping, get reusable bags instead of paper and plastic bags.
3. Go to you local farmers' market for fresh healthy foods instead of pre-packaged foods.
4. Use less paper because it kills trees.

We can all do our part to save the Earth!
