

After watching the film and listening the songs it was very touching and I feel very sad as I watched the film especially the typhoon and flood happened in Philippines some of my relatives were also experience that disaster.

Seeing our environment and earth as worse as what we've watch I want to tell to all our leaders to prioritize in protecting the environment and his people.

Thanks for everybody who is very much willing in doing social activities in orientating different people in the world in protecting the earth and environment.
