

Everyone who watches the film felt sad because many people are suffered different disasters around the world so I feel sad so much because my country Philippines is the one who suffered calamity. For the other country who also suffered from different disasters I am also affected.

For the calamities and different crisis which is the cause that earth become worse I myself can help by discipline myself to help our environment clean. Example, to prevent or avoid landslide we have to preserve our trees, avoid illegal logging to protect our trees that help to control water even if typhoon or heavy rain comes.
