

## Protect the Earth. Hug a tree!

by Catherine Cohen  
Our Lady of the Assumption  
Ventura, CA

The earth is very precious to people, animal, and living things. The Earth is beautiful and we must protect it. The trees that give air to people and other living things are being cut down. Trees give the Earth beauty, air, shelter, and many more things. Hug a tree TODAY! Pollution is disgusting. Do you want to see the stars more clearly at night? Use the car less, walk or bike more places, or even carpool. Whenever we use a car, we're making the air we breathe dirtier, unclean! Coming back to the trees, recycle more. Use the three R's (Reduce, Reuse, Recycle)! When you need to write a phone number down, use an empty mail envelop or write it down in an address book. When your doodling in class use both sides (if you can) of the paper. Save energy by turning off lights. Thank you for taking your time to read this. Protect the Earth. Hug a tree!
