

United Nations

**We describe ourselves as the smartest Primate,
So why do we destroy our wonderful climate.
Chopping down trees, poisoning our water,
Starving young children like lambs to the slaughter.
Corporations driven by the almighty dollar,
Impoverished people, living in squalor.
Stop clearing the land of life giving trees,
Stop dumping waste in our magnificent seas.
So full of life a place to explore,
Perhaps finding the answer we're all looking for.
So put down our weapons and stop senseless wars,
Let's hang out the flags, let's open our doors.
Let's all go one day without raising our voice
Let's smile at each other as we do have a choice.
Smile at adversity, plan out what you say
Avoid confrontation for the whole of one day.
If we can all do this then I'm sure we'll succeed
And influence the leaders, who all should take heed
It's now time we faced up to where we've gone wrong,
Get Nations united, with one voice and one song**
