

I am Thai and come from Bangkok, until now I'm still working with EVA AIR that is my second home. No matter whom you are or where you are, you are a part of the world. The earth or world is amazing place. It can produce the human beings, animals or living things. If you want to be with the earth for long time with your life, you should protect, save and love her. The ways, you can save earth, have many ways such as switch off the light when not in use, riding the bicycle instead of driving, turn on the A/C at 25C, plant a lot of trees, try to use recycle items etc. If one person can do all of actions, it will be save the earth to be extended. The easy way to save earth is nearby you. It depends on your hands and your actions.
