I choose this topic for not just protection for the child when it says protection. It means to me the child id safety and healthy and most of all the child is caring their parents immediately, and also it is important to have the child a protection or protectors of them so they can be protect in any dangers or any bacteria that can affect to them, so they can be healthy and safety, and it is very much helpful to the child or to all children to have protections, and it is very important to the child or need's by the child, so they can immediately safety to all obstruction or dangers comes to them, and also it can be learn when the child have protection they can also protection their parents in future when their become an adult. Because they think at their parent protect them.
