

Development

Student

School of Allied Medicine
Universidad de Zamboanga
Zamboanga City, Philippines

I choose the topic Development because it catches by attention, more particularly Development in my school-Universidad de Zamboanga. New facilities have been installed, which students can use and learn. There is renovation of school building in Institute of Human Kinetics, which gives a positive impact to students. Uniforms are also having a new style which I agree leaves an optimistic outlook. Rest Rooms are clean and well maintained. Personnel are very accommodating. There are so many developments happening in our school which I can say I am proud of. Students are equipped to face challenges after graduation, in virtue, the school is a molding instrument to shaped its product.
