Zamboanga City

We can save our environment by stop using chemicals and don't burn plastics to avoid air pollution and also we must have a proper waste disposal. Clean surroundings and of course we should plant many trees so that we have a fresh air and avoid landslide. We can also save our environment through r\the participation and coordination to initiate the proper and good will in cleaning in that sense we save our environment.

We can save our environment by cleaning environment once our environment will be dirty there will be a tendency it will become polluted. We can clean it by separating the biodegradable from non biodegradable. Once plastics will be burn it will affect the ozone layer. Once it will be affect it can cause green effect, and can kill the trees. We can save our environment by planting stop illegal logging to save our environment.
