Universidad de Zamboanga  
Zamboanga City

People must love our mother earth, as we live here we have a responsibility to protect our mother earth from any disasters, we to save our mother earth for us to live in luxuries. We have to cooperate, we have to protect our environment, and for that we should have peace, cooperation needed to one another to be able to do our responsibilities for saving our mother earth. Let's unit for the progress of our mother, let's help each other to avoid the global warming that could affect our mother earth. We must value everything we have to recognize the things that could destroy our mother earth like the illegal logging and more. We should help each other, like planting trees, it will help our environment from the flooding, and also for the natural resources we are rich in natural. So then we must do our job for it. We are the only one that could save our mother earth.
