Zamboanga City

Given by the scientist to save our earth it became a big cry from every of the world. How to save our mother earth from global warming every rotation, everywhere and everything they discuss this global warning about this global warming and how to save our earth from this biggest threat. Scientist had land down the road cause for this situation as the increase in the amount of carbon dioxide let as on the atmosphere by our industries and automobile. If this is going to be continue we may lose our land to ocean and the different climate condition.
