Child abuse, a willful action by a person (an adult) physically abusing a child or minor. Like adults would sometime hire children to sell drugs, or let them beg for money. And these children have no choice because they depend on that. They have no other place to go that's why they are forced to do it. It's a good thing that there are private sectors would help these children like the Bantay Bata of ABS-CBN. Government can't do this alone. They would bring these children to a safe place and help them rehabilitate their lives.
