“How to save environment”

For me I will tell people to dispose their cigarettes butts properly, not on the ground. I will provide many trashcans so that people will not throw their garbage anywhere. I will plant trees and avoid cutting trees. And we should also clean the surrounding to save our environment as an example I will teach my sisters, brothers and neighbor not to throw garbage anywhere and plants and trees in the garden.

In order to save our environment we need to clean our environment everyday and throw our garbage in proper place. We should not cut trees to avoid illegal. We should not burn garbage to prevent pollution. And trash people to clean their own surrounding and proper segregation of garbage.
