Universidad de Zamboanga
Zamboanga City, Philippines

Today many people are not aware about human rights many people were abused and used for negative things, like for example many teenagers nowadays are hooked with drugs such as marijuana, shabu, they were used by those rich people to make money, the economy crisis in this country is leading them to do so, because they wanted to be happy in their own way which is bad and the reason why teenagers/youth are being addicted and abusing drugs for happiness. They are not aware of their human rights, not all people know about the true happiness, its essence, some people are dependent with drugs and it means trouble to life.
