Zamboanga City, Philippines

All of us have rights, human rights as we say. These are rights and freedom given to the people living in a democratic country. Government is the one maintaining the rights of every person. The government assigned law enforcers to protect the rights of the people they serve.

But what if these law enforcers are the one abusing; taking away the rights of every individual they should serve? That is what happening in our society. We hear in the news that police are involved in crimes. Police torturing people; killing innocent people; these are just some scenarios that are happening in our society.

What do we want to happen with this? As civilian citizen, we should be vigilant in what are happening in our society. If there are law enforcers that we know that are abusing their position, we should voice this out to the officials that has power over them.
