Human Rights

Every person living in this world has our own rights, the career we choose, our course in college and the partner in life. As a human we have our own rights we know what would be the best to make us happy. No want can stop our rights as long we use it in the nice way. In government there is also a human rights this is to protect the people to stop doing bad to the other people. Every people must respect for our rights they can judge it as long they judge it correctly. No want can stop of what we belief and we know what's best for me.

Human rights are rights and freedom to which all human entitled.... Proponents of the concept usually assert that everyone is endowed with certain entitlements merely by reasons of being human.

On my own understanding human rights is that you have the freedom to choose or to express our own views another is the freedom of speech as a human we have the right to express or to voice out our feelings if we think that there's something wrong in a particular situations.

Respect to Human Rights

A recognition of the quality possessed by every human being as a unique worthy I rational and self-determination creatures I having the capacity and to decide what is the best for oneself. It is not undetermined by states of suffering disabilities or disease and the responsibility of cell to treat persons as a means. Manifest in autonomy (self- governance) or the rights of interference. A human rights should be allowed to determine his own destiny to deliberate about his plans choose accordingly.

World Peace

World peace is an ideal freedom peace and happiness among and within all nations and people. World peace is a utopian idea of planetary non- violence by which nations willingly cooperate. There are many ways to promote world peace in the world but perhaps the best way is to start the peace in our country's say no to war.
