“What is to be done to save the Earth”

People should do positive ways so that the earth will be saved, we should stop doing something which is not right. Here are some of the best examples that I can give which are the reason for the earth to destroy. Illegal logging and dynamite fishing, so in order to save the earth people should stop doing it.

As a steward of the earth we should protect and save the earth. To save the earth we should be very careful in doing something, avoid doing something which can affect the earth and our environment.

We should save the earth because that is people's duties and responsibilities to make always a way in order for our earth save. We should always keep our environment clean so that the mother earth will not affect.
