“How to save the environment”

Earth is only planet people are capable to live, god created many good things. to the earth land to the people but what do people do they are destroying it they don't even think if they will destroy our environment and mother earth people will suffer.

They say technology is part of mans life, they say without technology people will not live here easier. But they do not know technology causes more danger to oneself, foods, global warming, green house gasses, and many more are cause by technology.

We have many ways to save our environment our mother earth, the important is save first our self don't be blind, so that we can save our earth.
