### **“How to save the Environment”**

Everyone knows that now days the destruction of the environment is one of the biggest problem in our society and as a student and one of the resident of this country, the only thing I could do or contribute to save the environment is by just a self discipline by doing this, I am sure that it can be a big contribution in saving the environment. Of course, if you have self-discipline, you would know if what the right things to do example throwing the garbage in a proper place, tree planting an etc. and in saving the environment is always starts within yourself. If you are doing good, I am sure your neighbor will follow also what are the things they have seen from you.

Being a good model would also do. And the government should also find ways on how to stop the violators on doing an illegal things which affects the environment example illegal logger and those people who are using a dynamite fishing.
