

Human Rights
Pasculado, Michelle P.
Department of Civil Engineering
Universidad de Zamboanga

In this generation. I observed that many violation's about human rights. Just like some other school, they have this so called in quality of treating students. I've observe that when a student had a backer she/ he can pay easily for their tuition for not wasting in time, for me it is violation because they treat other student special its in the policy that before paying tuition you should fall in line first so that other will not feel that the school giving special treatment to others. I feel pity if some student can't pay their tuition on time, when they have to pay they wait for some day's or weeks. Some students having their misunderstanding because of improper of paying. That is a violation student's have right to complain regarding of that situation. They should threat student's equally so that the student's will feel that they are not violating the rules or their human right, not just these situation of violating we should have our own rights in order to protect our selves.
