As a human, human rights are important to an individual person. Some people violated the rights of others and that could lead to chaos and the peace living of an individual is at risk. Take a look on what is happening in our country today, the human rights is being violated by individuals because they think they are powerful, that is the reason why some of our countrymen is violated because of the possession of this individual. To our government officials we should put out powers at the proper way not just using it to violate and to disrespect the rights of others. In peace process, to achieve the unity, to have peace in our country we should say that respecting the rights of others have play a greater role in achieving peace and unity for all. If we people still disrespect the rights of an individual then we couldn't attain the peace that we wanted.

“If there is light in the soul, there will be beauty in the person. If there is beauty in the person there will be harmony in the house. If there is harmony in the house, there will be order in the nation. If there is order in the nation, there will be peace in the world.”

As human being it's nice to live in a world where peace is not rare commodity. Living in a world which is peaceful in nature is wonderful. It goes hand in hand with human rights. If there is no harmony in one place, the humans who are living there can't obtain solidarity; if no solidarity we can't attain peace. No conflicts will arise between its human being because they know where their limitations and boundaries to one another. These includes about the global community. This refers to the different level of people residing in one nation as we to other nation. To attain peace, one must begin first within us. We must learn to understand the different level of education, respect one's values, belief in general to be applied, no racial discrimination. Respecting other human rights, it's a way to gain peace and harmony in a place where we are staying. If only all human beings have proper understanding between people of different nations, peace is not hard to attain and human rights must be practiced and shared equally to both men and women, educated to non-educated, rich and poor. If this insight will be applied and practiced in a proper manner there will be no war against people, nation against nation.

So peace and harmony and solidarity will be gained at no cost. If only people could apply or give love to everyone and to everybody – make love not war. Our world will be a better place to live, where is a dominant element.
