

PEACE AND HUMAN RIGHTS

Eucar DS. Marcial
BS Criminology
Universidad de Zamboanga
Zamboanga City, Philippines

Peace starts within us. If we know how to love our people and neighbor there will be peace. If our country is peaceful, people love each other, because if there is peace, there is love. But nowadays, many people doesn't know anymore what is peace, there are some people fighting because of religion, culture and tradition. Like for example the Roman Catholic and Islam. They have different culture and tradition therefore sometimes they have misunderstandings. Some Muslims doesn't accept Roman Catholics, and vice versa. They judge and criticize what is the tradition each other.

In our country, there are a lot of crimes that violates the human rights of the people. Every individual has their rights, each one of us. We have the right to be loved, and cared, and free to do the things we want in life. Human rights violation sometimes is the root of war.

Always bear in mind that we need to have peace. We can achieve this if we know how to love and understand each other.
