

## **THE EFFECT OF WARRANTLESS ARREST**

Mendoza, Naizar A.  
BS Criminology  
Universidad de Zamboanga  
Zamboanga City, Philippines

The effect of warrantless arrest is the loose of trust of the people to the Law Enforcers. When they arrest they make some stories that are not true. They use their power not in the right way, and use their power to abuse some people. They should not arrest a person without a warrant of arrest. The person they are arresting have the right to know why they are there, and what is the case filed against him. The people should not be afraid to the authorities, they have their rights. All the authorities should know the rules and regulations of law, and people should know their rights.

The authorities should respect the people. If they are arresting a person they should show warrant of arrest. And the person can go with them, without physically forcing the person to go with them. The arrested person also has the right to remain silent.
