Peace! Peace is defined as the absence of war in a society. It is the harmony and happy living people within a place. It starts in a peace of mind of an individual that causes to an absence of argument and wars. Did peace is really present in our life? In our country? In our world? Do you have a peace of mind?

As I observe to our world today, I can't see peace. I can't feel the presence of peace because there are many wars happen, conflicts, arguments, and even killing or murders. There are also people who want to revenge, kill and even suicide. Why is it that there are people who like in a complicated world? Can't sleep if can't do a revenge? People who are eager and not afraid to kill? Can we find the word peace in this situation? Life is really simple but we just insist of making it complicated.

Peace comes from within ourselves, we can't find it to other people. But they can't help us in making peace, because you can't do it alone. Remember that, peace starts in our peace of mind. If you have peace of mind you can easily apply it to yourself and share to other. So, if we are eager to have peace in this world, we must start it to ourselves.

Peace is very important to our life and country. But why other people still making arguments and wars? Is it because of being selfish (thinking of their own good) or they really like a complicated world? PEACE is simple word to say. It is just compose of five letters and one syllable. And it is always mentioned in celebrating the holy Eucharist. A simple word but difficult to do. But I think, if you just know your rights and limitations, you can easily apply the word peace. And to have peace also we must be humble and patient.

There is also what they call human rights. This is implemented with the government to give way with the right of individuals. We have many rights as a people. But there is also people who ignore and snob the rights of other, especially on the poor people. Sometimes, the human rights and the justice are already payable. It is very unfair to the poor people because they can't afford to pay some amount to the people just to defend for their rights, to fight for them. In this situation, it's just the same that we did not let poor people insists their rights. Isn't it unfair? But it cannot happen if it can't be corrected by our leaders, right? It is also a way of saying that they are selfish. They just think for their own happiness, and for other. Rich people can even kill easily with the use of their money. Is there still peace of this case? Did we respect the rights of other? Let us always remember that money is an evil thing of our life. If we can use our money wisely, it will not happen. Avoid loving your money because it will lead you to evil, kill people and even kill the happiness and rights of others. And in this case, there is no peace and we just ignore their rights.

The government or leaders should have equal treatment to their countrymen because they are the model of the people. If they are bad, maybe people also become bad just because of them. But if they are good leaders our country may well manage and become a peaceful one. If the rights are really implemented to everyone with no excuses, no unfair of treatments.

The word human rights are already discussing in a public and private schools. They educate the students about these human rights. But students take it for granted. Not because they don't understand but because they can observe the unfair treatment of our leaders in our country. And that's why some of the cause of the conflicts in our society or the teenagers. And they learn this from what they observe in our environment. Maybe they are mad to the flow of our governments. They don't want the way of handling or decision making especially in human rights, because some government did not listen to the voice of the people, their freedom and happiness. But people also have mistake, because they already know what is right and what is wrong but still they do the wrong one. People also are selfish. That's why there is misunderstanding and no peace.

In peace and human rights, there must be respect, because this is also a way to have peace and to avoid the unfair treatments for the human rights. Respect yourself, because they said, if you want to be respected, respect first yourself. Many people are lack of respect because they are influence with the technologies that we have nowadays, they just snob our cultures and traditions. Before, the people are very respectful and well respected. But now, I don't know what happen. This is not the world I dreamed.

A person who do good things for other people can have a little peace, it really started in a friendship. A person who cannot commit violence can already be called peace. And if we have this, we can easily respect and can do right thing for other people. And by this, human rights are respected also. We must have to be fair, and not to be selfish. We must have respect, trust and discipline to ourselves. We must be always considerate and be understanding. Listen to an explanation for us to know the reason why they do this things and we can judge easily who is the right and who is just pretending to be right. I want that government function well and do their responsibility. They must not be payable. They must implement the right one so that they can't hurt to the innocent people.

In religious views, peace is achieved if we put our father almighty in our heart and mind. If we trust God and rely ourselves to him, we may satisfied cause we believe that God is the creator of all things. So if this will happen, the people may unite and be peaceful. But this will not happen because there are many temptations. One of this is the technologies that we have now. It really brings bad impact to us teenagers and even to children, especially the lusty movies. If this movies always seen by teenagers, they may think that it is not bad to do that certain movies. That's why there are many cases of rapes. One example also is the war movies. If children or teenagers always watch this kind of moves, they may think that it is not bad to kill or murdered. But we cannot already avoid this kind of movies that we have today. All we have to do is advice them and let them believe what are the things we want them to learn and teach also to be afraid in our ALMIGHTY GOD. Always guide them and forbid them to the bad things that influences to their personalities.

To achieve peace we must avoid violence, conflicts, arguments, wars and murders. I know, other people also want to have a peaceful world, country and a peaceful life. If this is our dreams, we must know how to control our attitudes and avoid the bad things that can cause misunderstanding. We must work together for the peacefulness of our country.

To achieve also the spirit of human rights the law makers and the peace makers must be united. They must have fair treatment for everybody, they must have no favor, don't accept any payments just to fight for the wrong one or bad ones. They must fight for what is right, and fight for our rights and for the rights of individual. And we must also respect for each other. If there is an absence of respect, maybe our right will be ignore and snob.

Everyone has a right to talk, right to eat, right to socialize, rights to enjoy and has a right to be free. We must not forbid others for their rights. Because we also need these rights, we also do these things. Everyone has a right, so everyone must respect each other. No one excuses!

In life, we need peace and we have also human rights. If we don't need these things, it's just the same as doing suicide, maybe only crazy people don't know and want peace and human rights. Can we consider a mad person has no peaceful world??? My answer is a big YES!!! Because he hasn't peace of mind, he confuses and riots, because of his problem. If this will happen to you, just follow what religious people always say, relax and pray to GOD, ask wisdom and praise him. In that way you can really accept your mistakes and failures and really want to be peaceful.

Now, can we consider a happy person has a happy and peaceful world? Maybe yes, maybe no, because there are so many people who are a great pretender. Maybe they just pretend being happy to forget their problems and conflicts with others. As I observe, a joker person has many problems than the people who are serious. Asking why? Because according to them, if they always think of their problems, they maybe come up with the bad conclusion or decision. They may commit suicide. They said, it's better to enjoy than to think always the unsolved problems. So we can't judge easily or even witness people, in short, don't judge the book by its cover.

Love is also a way of preventing conflicts and arguments, because if you love that person you can't hurt or do things that can harm him/her. Rather, you do the best thing for them, right? For your enemies, also love them. Forget all the conflicts you have. Give time for them to explain the cause why they let you hate them and they get angry to you. You must be thankful for your haters, because they just waste their time just to judge your wrong moves. By this, you can already control your feelings and you can easily apply peace in your mind and life.

Peace and human rights are just related to each other, because if human rights are abandoned, there will be no peace occur. If there is unfair treatment of our rights there will still be no peace cause the accused people got to be silent, cause everybody wants to be fair. There must be fairness to avoid the 3Cs, criticize, condemn, and complain. It will not happen if there is no action or move to be done and it is better if we start it with ourselves.

I know peace and human rights are the voice of many people. But why there are still people who don't want to respect, understand, or even listen to the advices of others? They are not crazy but still they are acting like a crazy one.

This is what they call dissatisfaction. They don't want to have a rival. They want to be alone, but still they need friends if they have worst or big problems. Isn't it fraud? If this is the case, they are fake friends, they are a friend indeed. It is still being selfish. And a person who had this cannot achieve peace in his life.

There is no peace if there is no human right. So, to have peace you must respect the rights of others and also respect your own rights. Be aware of our limitations and have a peace of mind. Love the things or people that surround you. If you can't, love that person you cannot feel the presence of peace. Let GOD be your guidance and let him forbid you to do the bad things you don't want to do. Set yourself free and mine your own. Do not insist to the other people, you must be considerate. Respect the human rights and feel the presence of peace in yourself. Peace be with us always!!!
