

PEACE AND HUMAN RIGHTS

Elen O. Cambel

Accountancy Department

Universidad de Zamboanga-Ipil

Zamboanga Sibugay Province, Philippines

Human Rights rest on human dignity. The dignity of man is an ideal worth fighting for and worth dying for. Respecting every individual which may result to a good relationship and a good relationship may result to peace.

That's the thing we want to have in this country and even though from the other country, peace is the one which will bring pleasure in one of us. Peace is the condition that exist when nation and other groups are not fighting, and also it is a result of the treaty that marks the end of quarrel and a friendly relations between individuals, untroubled by disputes and a freedom from noise, worries, troubles, fears, and etc.

Human right is the right to be free from governmental violations of integrity of the person which everyone of us has the right to express their feelings, emotions and also their opinions. Also our governments implement a law to protect against abusing their own rights. Respecting everyone's rights may lead to a good understanding to each other. Respecting everybody's rights may result to peace which one of us adored it. Human rights are universal and indivisible, and it is the way that make us human to exercise our rights and when we speak of the right to life or development or to dissent and diversity, we are speaking of tolerance.

Tolerance will ensure all freedoms, without it we can be certain of none. And it is another word for difference. Difference which bring every human in a better life with great and happy living and if we have honest difference are very often in a healthy sign of progress and brings peace. If we have rights as a human we become dissent and dissent does not include the freedom to destroy the system of law which guarantees freedom to speak.

Our country was founded on the basic idea that all man and women are created equal because all human beings are born free and equal dignity and rights, created equal with liberty and justice for all, we must respect and preserve the rights of all, for when the rights of one's threatened the rights of all are diminished. Only justice, fairness, consideration, and cooperation can finally lead man in peace. Peace, which we know it is a climate of freedom. The freedom from other's secured and freedom is not worth if it does not connote freedom to err. Respecting anyone's rights is not just like treating them and praising them but the grandeur of humanity is in moral elevation, sustained, enlightened and decorated by the intellect of human.

Respecting other's rights so that they can respect you too. As what you are and who you are, respecting your weaknesses as a human. If you have respect in yourself you should never violate the sacredness of your fellowmen because if you violate them it is just like simply says that you never respect too, because individual is same, same in the rights and also their sacredness. Every human have their own freedom but that freedom is within only in their limitation. Limitation of what a human being can do.

Peace is not just a word but a condition, a condition of everybody away from noise and fears and a condition of survival in this nuclear age. Respecting each individual right may lead to a great peace. Peace brings success in our society and also in our own selves. Without humility there is no humanity. Which is humanity is the equality of being without pride. Moralizing and morals are two entirely different things and are always found in entirely different people. Dignity

of a person does not measure on what he do but on what he is understand on what is the real meaning of life.

Peace is the site where everybody love one another, respect each other's opinions, weaknesses and etc., and where anyone can resolve conflict where the root of cause begin. And also human right is a lawful act that seeks for human goodness. Therefore, peace and human rights for God's sake is for everybody else nonetheless.

All we need to do is discipline in our selves, follow the rules and regulation that the authorities complied so that we have peace in our world. Peace is very important in one's life because it makes you feel comfortable and even better.

In every human's life, peace is necessary to everyone should put and bring peace to his heart. We cannot follow all the does and don'ts if we ourselves do not bear peace. Human rights was created, in order for us to be fair and that we are all Filipinos. Country that doesn't have human rights doesn't have peace but rather war could be done.

Human rights are the right of every human where they are free to exercise it and to expose it in the crowd. If anyone respecting each other's rights, there would be no quarrel or even war happen. Only man is the reason of deteriorating his self too ... because he is the dictator of his own self so that's why if he failed he's the one who suffered it. Human right is a privilege of everybody to have it. The reason why people pursue to have fame because of their personal interest or else their human interest, pertaining to the concerns, interest, and the problems of human beings or it is appealing to human emotions and personal experience and these reasons may lead to disrespecting on other's right.

Human rights are the rights of every human that shall be embodied by law, and shall be applied in every consequences to those person who violent this law and to who doesn't follow, shall be punished. Thus, human right brings peace. These are the rights to the fulfilment of such vital needs such as food, shelter, health care and education and it is also a right to enjoy their civil and political liberties. Liberty is always dangerous for some it means a great responsibility. Therefore, the ideally free individual is responsible to himself. Violence is cause of disrespecting each other's rights and violence cannot build a better society nor is it the cause of quarrel. Disruption and disorder of peace would be done, not justice anymore. It strikes at the freedom of every citizen. I believe in the supreme worth of every individual and in his right to life, liberty and the pursuit of happiness so that we should respect the rights of others. Everyone has their rights to have their own liberty which is the condition of bring free to choose, and a condition of being free from physical confinement and captivity.

If we want to live together in peace, we must or should know each other better.

Every individuals need to exercise their rights so that they cannot abuse by anybody. If you respect your fellowmen maybe they can respect you too. Brotherhood should be implemented so that peace would be done here in earth. Having peace should be starting in respecting every human's right.

Peace, it is a simple word and very self explanatory but in the side of others, it is something also that needs more explanations in order to be fully understood and clearer to them. But we as human beings have our explanation and views what peace really is but my own point of view, peace is when everything flows well or everything is in order. People to people have their good understanding and relationship towards one another. Peace comes from love of one another; it also comes from us and ends with us if we break the good relationship of each other, so that, we should have peace in our fellowmen so that each of us will successfully progress.

Human right is all about our rights as human or our freedom to express or do things which we wanted. It is necessary to all especially for us Filipinos to have it, in order to have a better flow of living and also a better community. We are just lucky enough to live in the democratic country. Where we are free to decide and express always but also it is have a limitation, everyone of us have a freedom to exercise our rights but we should put a limitation. With human rights, it will help us to build peace in our society or else in the whole world. Simply because people can exchange feelings and opinions to each other in many ways but in good side and also have limits. Peace is lifetime process in which human being has to develop in order to have a good and convenient life. And as we go to this process it as good as we are. To gain this kind we want a peace, each of us should make a difference in ourselves by doing what is right and abide the law which results to a good understanding and wholesomeness.

Human rights are made to protect the people who are in a chaotic system of life. If we humans has the rights in which we use in the right way we can maintain peace with each other and there will be no wars, cruelty amongst men's slavery and doings which is not fair to mankind. Having rights among of us is a key to learn what does the value of having and living a good kind of life.

Peace maintains the equality among men, gain more investment among other tribes, thus peace prevent that crimes could occur, if there is peace no men is in a thought of doing crimes nor committing crimes. Thus, if we people use the freedom of having your rights hopefully we should not abuse it, this should be the one that we will put in our minds to gain peace. Because it is the one that everyone desired to have. Human rights are also what we need to make our lives better.

Past decades our world is not in peace, we suffer in conflict because of the nation's war among other nations, and very disgraceful thing is many lives had been lost; many suffer from difficulties and crisis. Difficulties thus who suffer, and then they dreamt of peace should be restored. On these tragedies human rights is not there to help those who suffer from cruelty.

Peace and human rights, if this two will combine the result would be a happy and having an equal life. Every one of us does not suffer any cruelty again. This two would combine has one purpose is to have a better life which we want to have, each one of us. Living with peace of mind and society is like living in a beautiful place where it is far away from noise and fears. Some people ignore the rights of others because of the sake of their selves too, but even if it is the sake of you just make sure that as you go through your life, make sure that no person's right could be disrespected because everyone of us deserves great respect.

Having respect in the rights of others maybe result to a good understanding and also a good communication and maybe it also avoid us in some sort of trouble that we can't bear. Ignoring others rights may lead to conflict misunderstanding to each other which may result to a quarrel. Peace is a way also so that we can determine success, but why does other people trying to terrorist? Are they didn't know that they are doing is disrespecting the rights of other people? What are really their motives? It's just that this people are anti-peace. But no matter how cruel they are, because of their rights as a human should be raise, they have also the rights to live where they can enjoy all the things that GOD created. If one of us wants peace to have in our life it starts with our own self. And respecting rights of every human can also result a good relationship.
