Universidad de Zamboanga-IPIL

Zamboanga City, Philippines

Peace is a passion to share and to serve our country and fellowmen. A compassion for the world's crippled and maimed, and a love without retention limits with measureless breath and depth. Peace had been also compared to the whisp of wind in the noonday heat and momentarily, it would fade away quickly and evanescent. By the implementation of human rights, peace would easily fade its essence if people will abuse their rights as humans who have this unlimited wants and desires in living the world of survival. However, the hue of the desired peace among nation would be achieved and would probably provide a wide ground for establishing growth and continuous flow of abundance in every person's heart.

As what we observed nowadays it is difficult to find peace unlike before. Just like what happened in Maguindanao, many innocent people die because of politics. There are people who really kill a life of innocent people just to have power. Even in urban area sometimes peace doesn't exist anymore. Wherever you go you can find crime (robbery, hold-up, kidnapping). Many children die because of never ending war. They end life of innocent children wherein fact they are too young to die there a lot of thing they can do to their life. Peace is a throbbing healing yes! To the walling of children for food, the outstretched hands of the poor for justice, the hunger of a nation for integrity. But how can we follow if the leader of the country itself doesn't have peace within their self. And now the election of SK and Barangay Captain is fast approaching I hope we will choose the best leader. But in politics nowadays those who are running for any position in politics they are now buying the vote of the people so that they can win. You cannot run for politics if you don't have enough funds unlike before if you want to help your fellowmen you can run so long as your goal is to help your country. But it is not private today. I hope we could change this kind of activity. We should use our right to vote the best and nothing but the good leader. We should give important to our life. We should spread the love to other people so that we could find peace within our self as well as to other people. People have the right to live life because no one is allowed to get life except our creator. Life is very precious, it was given by God and we should take care of it because we could only live in this world once. We should promote peace in our world. We should be a peacemaker just like what we do on September 21, 2010, we run for peace. We join the campaign for peace even in a simple way still we contribute and it means a lot already. We should start within our self. I know it is hard to have peace nowadays but we should not loss hope still we continue there's no harm in trying. We don't know that even in a small way we can influence others then there will peace already.

Every human in these world have their own right. Every citizen possesses different rights that binded by law, the right to life, the right to be educated, the right to be respected, the right to be loved and be loved and many other rights that is very essential to human beings to give importance of individuals right and give us wisdom how to build relationship with others without discrimination and injustice and build relationship that shows equalities. And all we have to do is to respect on what ever may happen. Once we respect every right of individual then there will be peace in this world. One way of having peace in this world is we should respect, love and understand one another. To promote human rights standards in post-conflict societies, many psychological issues must be addressed. Societies must either introduce new social norms or reestablish old moral standards. They must design programs that will both address past injustice and prevent future human rights violations. Human rights must not become just another compartmentalized aspect of recovery, but must be infused throughout all peace building and reconstruction activities. Democratization implies the restoration of political and social rights. Government officials and members of security and police forces have to be trained to observe basic rights in the execution of their duties. Finally, being able to forgive past violations is central to society's reconciliation.

As we live in this world everything is fixed but as time goes by the behavior of human changed they start to do bad things until such time other people get use to it. They start hurting people and time comes they are not only hurting them but instead they start killing life of

innocents life. That's what the worst thing they are just wasting their life of doing bad things. I know God is very sad to see his children that way. He created life on earth because he wants us to be happy to live in his wonderful life. But look what other people have done they take advantage on the goodness of God. I know time comes that God will get back what God had created because as what we observed nowadays many unexpected events happen. Look what happen to some places in Luzon. Many typhoons destroy lives of people in Luzon. God is starting to punish us, he start to get what he has given to us if we don't change our bad attitude. I know someday we will die but before we die we should did something good to our lives as well as to other people. And we have this standard and pious law that should be followed prior to what had has been written and it should not be presumed because it is fixed and had been agreed by the people with human rights to achieve peaceful community and abundant with peace, justice and solidarity. The supreme good ,truth and life to be principally build- in spirit was granted with full recognition and accordance with the capacity of humans wherein we totally distinguish the good from evil with the help of human forces with understanding to the society's need to build great and ultimate desires of every person and that is to be peaceful.

Human rights are international norms that help to protect all people everywhere from severe political, legal, and social abuses. Examples of human rights are the right to freedom of religion, the right to a fair trial when charged with a crime, the right not to be tortured, and the right to engage in political activity. As what we observe in the news one of the most common problems in our country is the violation of human rights. Just like what we saw in the news the police brutality happened. They tortured the man which happens to be the suspect of a certain crime. They did some manners that are really against the human rights as well as in the law. We all know that once a person caught in doing some crime or have done something against the law will be liable and should be put in prison. But, it doesn't mean that the authorized people just like the police will make some action which is against the human rights. To protect human rights is to ensure that people receive some degree of decent, humane treatment. Because political systems that protect human rights are thought to reduce the threat of world conflict, all nations have a stake in promoting worldwide respect for human rights. In addition, the use of violence to end human rights violations poses a moral dilemma insofar as such interventions may lead to further loss of innocent lives. Therefore, it is imperative that the least amount of force necessary to achieve humanitarian objectives be used, and that intervention not do more harm than good. That's why the COMMISSION ON HUMAN RIGHTS did some action to solve that problem. We have the organization that will help us in case we suffer from that kind of problem. We should preserve and fight for our rights. We should not let other people to step on our dignity as a person. Each one of us has our own rights. There's no rich or poor. But, sometimes we cannot deny the fact that only those rich people can have justice sometimes. If we don't have money, it is really hard for you to find your justice. As what we observe nowadays, many rape victims don't attain the justice they wanted. And the suspect that is rich will let their money work. They will just pay the man in the position for the purpose of keeping them in safe. The reason why they do that to able for them to protect or preserve their image. But why they do that, if they don't want to have a bad image? Sometimes we cannot understand why other people are like that. They have the behavior that is hard to understand. I hope we could change that. I hope that there will be justice no matter what status in life we have. We should fight for our right in order to have peace in the world. It is not hard to find justice so long we have the great leader to protect us. We should choose a leader that has a good intention, a good vision and mission which is to have peace and order in the country. IF we have peace and order in the country and in the world we could live full of love and harmony.

Even in a little way at least we contribute for the better of everybody. We should help one another for common goal to have peace on earth. Otherwise, we will no longer experiencing the true beauty of life and its growth towards our existence. A culture of peace values justice and pursues sustainable development, respects the integrity of cultures and the natural environment and promotes social order based on equal human rights, the human dignity of all persons and reverence for living creatures and life systems. If there is right in the beauty in the person, there will be harmony in the house. If there is harmony in the house, there will be order in the nation.

If there is order in the nation, there will be peace in the world. So therefore we should have peace within us.
