Zamboanga Sibugay Province, Philippines

As a student I observed nowadays are lots of strategies to come up our nation. Peace is the important or the best way to maintain in our self and the human rights is the only things that belong to our self. And on the other hand peace is harmonious relation by citizens on the society is the way from harmful elements in against the law. The existing problems and politics or rather for the government in the Philippines is the one most issued in our nation and also considering the economic crisis. Peace is very important because our nation in the Philippines we need peace that signified peaceful to bring the unity of the Christians and Muslims.

As all we know human rights is freedom that every individual has a freedom. Peace we will in our self we know how to accept sorry and respect for others or failure to others. Peace is never ending effort to make by people as well as we live, we must do something for peace even in the simplest way we can do. Peace must begin each one of us. Trough quite and serious reflection on its meaning, new and creative way can be found to foster understanding, friendship and cooperation among people.

To me peace means that there is no killing, there is no bloodshed. Tome, peace means we people all live in one community. In this community everyone laughs together and everyone works together for a common goals. Without peace, we people live very harsh, for instance, family may break and we lose our properties, even our love-ones when there is a war. Every day we need to worry about if our life will be taken. Living in such a dangerous and hopeless place, how can people live happily and peacefully? Peace is not about the absence of war or hatred, but also the presence of cooperation, compassion and worldwide justice between all humans. Peace begin with us, when in our hearts have a feeling of serenity, we can look about each other with love and concern. Then all will be well with us in our surroundings. If we can free ourselves of the ills of greed and jealousy, then we will have peace. The world will be a better place because of us. Then indeed we will have everlasting peace.

Peace describes a society or a relation that is operating harmoniously and without violent conflict. Peace is common understood as the absence of hostility, or the existence of health or newly healed interpersonal or international relationship, safely in matter of social or economic welfare, the acknowledgement of quality and fairness in political relationship. In international relation peace time is the absence of any war or conflict. The study of peace also involves the cause of its absence or loose. This potential cause includes insecurity, social justice, in economic in quality, political and religion radicalism and acute racism and rational. I mean if a country manage to make peace region it's because at first it has erased the theory problem People are happy when there is no problem anymore, so they are not angry, they don't need to go on criticizing when everything is ok. In a word, we have to resolve main problem, to be able to develop and to get peace. I'm very interesting in this as I am studying at School with my teacher, in my opinion I think peace is also essentials learn what is happening in the other country and why some countries are war in order to realize hoe peace is important. Knowing about the others is a form of respect and enables us to teach our children peaceful values. Peace in our societies means eating much, enjoying more, travelling in exotic country. Perhaps, I am an ideas woman; if we need peace e must help our world, to develop their countries.

All human beings are born free and equal in dignity and rights. The study of the evolution of the idea of human rights shows that they all flow from the one fundamental right the right to life. From this derives the rights to those conditions which make life more truly human, religious liberty, decent work, housing, healthcare, freedom of speech, education and the right to rise and provide for a family. We people know that human right is a very important topic in our society. Many of us do not know the technical aspect as a result so many people who experience discriminations as part of their daily lives. The bottom this essay is if the implementation of human rights is good peace will occur. All what we need is not acceptance and respect to make this world a better place to live with.

Human rights are rights to all human being, whether our nationally peace of residence, sex, national or ethnic origin, color, region language or any other status. We are all equality entitled to our human rights without discrimination this right are all interrelated and invisible. Universal human rights are often expressed and granted bad law, in the form of treaties, customize international law, general law lays down ovulation of government to act in certain ways or to refrain in certain act in order to promote and protect the human rights and fundamental freedom of individual or group. All human rights are invisible, whether they are civil and political rights such as the right to life and equality before the law and freedom of expression; economic, social and certain rights such as the rights to deployment of one right faculty advancement of the other likewise the discrimination of one right adversely affects the other. Human rights are not for everyone that entails both rights and freedom and it prohibit discrimination on the basic of just non exhaustive categories such as sex, race couture and so on. All human being are born free and equal in law to respect, to protect and to fulfill human rights.

Peace and human rights are orderly organize in our country regarding this institution, people wants to have exactly, no wars of cruelty force that enable to distract government constitution. Each of us has powers to steep rights and justice in our country which constitutes the social justice and human rights in our public. Every citizen has power to provide justice of such things towards in better way labor, health, education, technology, arts and culture science spots, language and as well as the family, this may lead to our interest, needs, incentives, or wants in order that we can attain our better future.
