My own perception of peace is ZERO arguments to other people, living a simple life with peace and harmony, having no enemy most of the time or no grudges to other people, welcomes ideas of other as well as free to do things that the heart desires.

Being friendly is a sign of peace as well as sharing some ideas, spending special moments with love ones, showing concern for others and avoiding conflicts as much as possible. But reality proved that conflict is inevitable. Bringing it to the minimum will also lessen the implication in interactions.

Human are social being and interacts with fellow species most of the time. Each person plays an important role in this planet, as well as in the community. Each one of us must have a peace of mind so that it will result peace on earth. Each one of us must know the importance of peace for it has a lot of purposes in life. Peace plays an important role in our community as well as in the whole world. Peace is what everybody needs. Let's give it a chance.

and such as freedom and has a right to live. Every human being has a right of what their endeavors, interests and chosen fields in life as what they think that what is right for them and also for others. In our history there is no human rights because many people have been abused, molested and treats like a slave, especially the poor people, only the rich and land owners have the power to rule the poor people whatever they like, because they have' money they use money and wealth to get the things they and wants in life.

Only rich people have justice and rights, unlike the poor ones, they must work hard for only to eat their meal three times a day, they serve and being slave by rich and powerful people for only to survive. Unlike nowadays we are in democracy, have justice to prevail, as well as human rights, if you do crimes, you'll be imprisoned. All people has right to live and have freedom as long as it is legal according to our laws, we have a right to choose our leaders for progress by the use of elections, we have governments program to support the poor people, for the people and by the people. We have a right to say our inside feelings due to our governments and our concern for the environment.

Some people choose to be a rebel to our nation to fight for their rights because their voice and their commitments are not being heard by our government for they are deaf in such that people observes their wrong doings. Some of our rebels would kill civilians in order to be heard by our government, their voice shouts for their rights, just like to the ordinary people when we see a wrong governance by our leader, it will have a rally happens, and if government trashes the right of the people, it would end up with war, killings and crimes.

Human right is not the hindrance to maintain peace and order, we must fight for our right in order for us to live in liberty, we will not only to keep in silence because no one will hear our feelings inside of ourselves through our heroes, we learn to fight for justice. Every human has a right to live, to pursue our dreams, we think for good first and ask, "Am I doing right?", because for our defensive, we hurt someone that we doesn't mean it. we must keep the peace in our minds and heart and control our temper. People have different principles in life and that principle is

what the people think that is considered right for them, as long as that principle is worth fighting for.

Human rights has limitations, for example a person depends on his/her rights, not at all times that everyone agree with you, sometimes it will results injustice because you are unfair to the others, we must think for others also for it may break our silence and peace and results lasting.
