Peace for me symbolizes unity and a part of a whole. But first it should start within us in order to have peace in ourselves, home, and even in our entire nation to attain the common ground of peace in every races of humanity. Peace can bring no war, peace of mind, and unity to us, rather than to experience atrocious events like what we have experiencing now in our nation. Giving a peaceful treatment between Christians and Muslims is a way to a happy life. Definitely, it can cause freedom, freedom that lifts us to a lifelong happiness. Lifelong that we are happy and loving each other. To make different countries unite let us implement "PEACE" that can bring us to great world with no discrimination and full of love.

The rights of the less fortunate, disable, minority group and even convicts must be granted. Thus, regardless of gender, nationality, cultural or religious affiliation and political stature human rights should be observed to have lasting peace because peace and human rights is way to unity, great world, and peaceful surroundings. And also, it can bring us hope that symbolizes future with full of ambitions, ambitions that make our mother earth a planet of peace and love.
