As an individual we all want to have peace in our country or in our place, we all want to live in a peaceful place, but we failed to achieve this because of the people around us.

The beginning of peace starts from us as a human being; we are the one who are responsible. Peace begins with love and understanding and respect but how are going to do those things? It will starts from our own self, we should learn how to love ourselves and respect ourselves. If you want to be respected by others, learn first to respect your own self, and as a human being we are all have this human rights or freedom to live in peaceful place. But as I've said it is hard to achieved because of the people who are not concern about their place or even about the people around them because as I observed, life's today is so different, and people today is also different, maybe because they were lived in a high-tech world. People today are not so conscious about what happened in their surroundings. Maybe because they are just concerned about their selves or they are self-center.

As I observed in our community, people there are so self-centered, also in our own country. I've notice that Filipinos can only enjoy the kind of life they deserve and aspire for when there is peace in the country. When human rights are respected, protected, promoted and fulfilled, economy also develops. When there is conflict, the economy is affected making it difficult for economic rights to be fulfilled. Therefore, everybody must promote peace for a better world.
