

## **Peace and Human Rights**

**Rosel Batusin**

Universidad de Zamboanga-IPIL  
Zamboanga City, Philippines

One that was walking in the rain, hearing the madness of every people, murmuring, laugh of a such devil, voice of an anger man, shout of some people that may the shout to stop nor the shout of joy, cries of the babies nor cries of some people that are bloody and begging for help and whispering with the cool and frightened voice saying "PEACE". Does anyone sees and hear this word? Why peace does not exist? Why? Human!!!Human!!! , this is all because of human that has its own rights. Rights that abused, presumed, and take for granted. Who must blame of this? Politicians. Or people around them? That over recent years the number of killings of political and community activists in the Philippines has continued to increase. The methodology of the attacks has led Amnesty International to conclude that the attacks constitute a politically-motivated pattern of killings. The organization remains gravely concerned that members of the security forces may have been directly involved or been complicit in the killings. As peace talks between the government and the communist opposition stalls, human rights violations continue in the Philippines. There are over a hundred political prisoners in jail, and detainees continue to be tortured and mistreated during interrogations. The security forces have been responsible for a number of forced "disappearances" and extra-judicial executions, while private security forces and unidentified armed men have responsible for the killings and harassment of civilians in the context of land disputes. Muslim armed opposition groups have also been responsible for kidnappings and arbitrary killings. Hundreds of people continue to be sentenced to death by the civilian courts.

Every one of us looks for peace that will nourish and cherish our daily life's especially for those innocents living in silent places .but because of the rights of every human to do such thing, many wars that happened even though when I look back with the years when I was a child, wars are exist until I grew up and this is now, the most saddest and worst thing happened in this world that the war of nation to nation. It kills some of people including innocent person especially babies .So sad thinking that we are given the rights to love ourselves, to love others, to love God, and the like but we just ignore it. Why do we need to kill others? Is it our rights? So knowing that only God knows and can take or get life, not of us! Did they think of that? To live a happy family, with tears of joy, laughter's and love, seeing the children's that playing the ground soundly and happily, where peace is there, why they did not let this thing happen?

I did not even think of what foolish people needs and wants just to think and take realized of their doings. Thinking that our justice is now injustice so there will be possible an everlasting and no peace in this world and they did not even think how peaceful our country had before, how happy people living in any different places catching any foods to eat with their beloved family. If we think that wars happened before but it has its purpose that is war to fight our own freedom and to save people not like now that usually every minute, every hour, and everyday wars are always happen, I don't know what happen now to our country, as if that wars are just not an ordinary war but it takes very worst memorable story of our country, to every people and to other countries because many people in other country that involve in every war of the Philippines. Honestly, we Filipino or here in the Philippines, we

are the 5<sup>th</sup> country that belongs to the very worst countries in all over the world. I can't imagine what country have we now that we are in 5<sup>th</sup> worst country of how heroes before handle our country but there are still fool person who against the goodness of our country. I can say that, this all because also of politicians and other people around them. Because as a Filipino we are given the rights to choose a person who fit and capable to handle our country but obviously they choose the wrong person and this politicians also take abused of their responsibility. Even now governments, and politicians cannot trusted because some of them are all back fighters, they are all the reason of many wars happen in our country. Imagine, a little sin of a person especially if she/he is only poor, he/she can easily caught and put to rehabilitation center and the worst is that they did not stop the issue until that person die unlike other people that are rich (ex. governments and the like) they just only work their money and so much for that they can easily take away of that problem and can easily stop the issue of them. This is all because of unfair treatment to each one of us, that's why many wars happen in our world .How does this thing being solve that what we choose (ex. politicians) to serve our country, if one of them are involve of this worst thing. That is why many people hope to have peace in this land but were we put them if our places full of wars. So may peace exist now, may people end this war and take peace in this land because as we all know that people seeks those places who have peace so we must end this wars and feel the essence of God so that this are all take away and think that it is just a dream.

To have peace, we must begin peace within ourselves and put light on ourselves in the sense that "if there will be light in the soul, there will be beauty in the person; if there will be beauty in the person, there will be harmony in the house; if there will be harmony in the house, there will be order in the nation; if there is order in the nation, there will be peace in the world. May the rights of every human settled and begin to give importance and valued peace. I hope people may know about this and take peace a very necessary and a meaningful one. I know, each one of us can take this peace widely and successfully done!!!PEACE and HUMAN RIGHTS.
