Peace should start from us, as individuals, and in our family. Peace is the absence of war, violence or other disturbances. To me Peace is a picture of healthy culture.

Peace can describe calmness, serenity, or silence. Peace is to live in harmony with our environment. To live in harmony with my environment means to live my daily life considerately with my fellow citizens that I should not worry of being kidnapped or killed by terrorist or abused by people with high position in government offices.

Peace is important because we need a better world for the next generations.
