

PEACE AND HUMAN RIGHTS
Sharmaine Mascariñas
Accountancy Department
Universidad de Zamboanga-Ipil
Zamboanga Sibugay Province, Philippines

If there is righteousness in the heart, there will be beauty in the character. If there is beauty in character, there will be love in the home. If there is love in the home, there will be order in the nation. If there is order in the nation, there will be peace in the world. Peace, peace, peace!!!! Peace, living with a harmonious life, surroundings, or place human rights treating a person or an individual as a human being.

Nowadays, peace is not effective to other places in this world or doesn't have peace in their society because they will always quarrel and they always think of their ownelves, and there's no human rights, because other people doesn't treat person as a person ... others don't have a freedom.

When there's a peace maintained, the development will be sustained. Crimes where the most instances of our society now, because of crimes there's no peace in our society. So the Jaw enforcer and the peacemaker are having an idea so that crime will be lessen in our society. Filipino can be enjoy their life if there's peace and human right are respected, and fulfilled. Peace-building is the protection of human rights. Without peace, we don't have fear and freedom of what we want to do. Peace and human right are not only for Filipino but also to others. Peace will be respect so that there's a human right. When there's a conflict, it is so difficult to fulfilled a peace in our society. To maintain peace in society, human rights win be respected.

All of us, human are born free and equal in dignity and rights, and we will act one another as equal, it's related to this quote "love your neighbor as you love yourself." So we will love each other just like we treat of ourselves, so that other people will also love you. Every person has to have rights, because they are human being, so they will treat as a person and not an animal. And these rights are to protect you when you are to be hurt with the other people, and they will also help you if you are in need, and help us to get along with each other and live in peace. When human right are not well known by people, abuse such as discrimination, intolerance, injustice, oppression and slavery can rise, and this will happen especially when a person is poor.

During World War II, the United Nations Universal Declaration of human rights was signed in 1948 to provide a common understanding of what everyone is right are. It forms the basis for a world build on freedom, justice and peace. The question is, how can be the nation will be peaceful if every person doesn't have a human rights? Why is it that there's a people that can discriminate other person? Are we born here in this world to discriminate others?

All of us are born here in the world in order to socialize others in a right way in peace and not to create a conflict with others, and we have a freedom of what we want to do, we have a freedom to eat, and to stay in a safe place. If you live your life with harmony, or you have

harmonious life, and you have a good dialogue to others, so the other person will really inspire you, because you have a good heart, and you can have many friends because of your nice attitude, because you have a peace in your own heart, then you can success what you want to do in your life and you can have a good future. If you have a peace, then you can have the human right.

In your school, especially the student, do you a right to choose a friend with your classmates, right to listen with your teachers while he or she is discussing the lesson. In a friend you have the right to share your problems, in your family you have the right to love them and respect them, because they're the one who support in your studies.

Nowadays, other person doesn't have a peace and human right because they are full of problems in their ownelves, family, and friends, and in their society. And because of this conflict with each other with reality, realty the outcome of this.

If there's no peace and human rights how can we improve our world? Maybe our world today if there's no peace and human rights maybe it will collapse, and it will not improve, and others are also quarreling to each other, we cannot have friends, cannot go to school, and in work, because there's a big, big conflict to each other. And because of these big crimes there will be no love to each other. How can you love others if you don't have peace in your ownelves? Nowadays, not everyone can have the right, especially when it come to court, because you are a rich one, there's a possibility that you won the case because you gave money to your attorney, while if you are a poor one and you are in the court there's a possibility that you will be the one to get or handle the case, because you don't have enough money to pay to your attorney, that's why you will be the one to put in a jail. Rich people have the right to buy a bongacious car, home, and branded things, they can ate a delicious food, and they have many friends because of money. White the poor, they can't have the right to get the same with the rich people, can't own a car, can't ate a delicious food, and can't have many friends, they can have a friends but onJy few, because they don't have a lot of money.

Why is it that these kinds of attitudes happen in our world now? Why? How can we enjoy ourselves of being respected and protected with others if we don't have peace and human right? Peace and human right are the one who can improve our nation. But how can we improve our nation if there is other person that doesn't hear our call? They always listen to their ownelves they didn't listen to other's call. They want that what they want to do will be respected, and it is so unfair to everyone, and because of this people, other can get a hard feeling to each other, and another conflict will be the outcomes of this. Because of this kind of attitudes, others can't have the strong nerve to get what they really want, they doesn't have the freedom to choose. This is so really, really unfair to other people.

Is God chosen a person to be loved? God doesn't choose a people to be loved, He loved us equally. So we have to treat there's equally just like God. Peace is the key of success. Why? because if you have peace in yourself, there's a possibility that you can achieve all your dreams.

Peace will start in a single step. It will develop, develop, and develop until it will end in the world. Peace will start first in the heart, second is in the character, third is in the home, in

nation, and last is in the world. Peace is a cornerstone of progress- economic, social individual and national growth. It is a cornerstone because one's we are in the nation, we have to Jive peace in our heart, we have to build peace in the economic, social individual, and national growth, because without peace in our nation we will not be a successful one, without peace there's no understanding to each other, and there's a misunderstanding.

Without peace there's no human right. All of us have the right to think, right to go with, and right to choose a person with, or in short freedom. If God are treating us like His son and daughter, so we have to treat other person also equal, because they are a gift from God. As what I have said, peace will start in a single step. It start first in heart, because in heart if you have peace you can treat other person as what they really are, and that is your human right Second is character, if you have a good character, you can have a peace in mind, and you will not bother others problem. Third in the home, in the home because if you and your family doesn't have a conflict, so there's a possibility that you and your family has a good relationship to each other cause "A family that praise together, stays forever." The fourth one is in the nation, if you have already peace in the heart, character, home, so you can now proceed in nation, if there's peace in nation there's a possibility that all of us will be happy and we can have a human right. And the last one is in the world, if you can have in four things (heart, character, home, nation) now you can proceed peace in the world, if there is peace in the world, there's a possibility that our world we be in a good relationship to each other.

Human right, it is given to each one of us so that we can have the right things or freedom what we really want to do in our life so that the other person doesn't have an authority to treat other like an animal, if they want to treat them like a person, so they will treat us like what they treat themselves because all of us are son and daughter of God, so that there's no conflict happen in our world. Conflict is really the first crime in our nation. Is this really our world? To create a conflict or to live in peace? Her people doesn't treat equal and sometimes this will happen to you have a power, and the person who doesn't have the power is so hopeless to live in this world because they can't have the right to be friend in a person who have the power. And this kind of attitude is really apply now of the other person, and it is so obvious, especially in school, other student can graduate if the parents if the student gave a money to the professor, in politics a candidate will won if there's money gave in the society, people doesn't think what will be there future isn't it good future or a bad future. And those who doesn't have a power in school or either in politics and etc. you will not be graduated and you cannot get a high grades, because you don't have money that you can gave to your to your professor, in politics you cannot won if you don't have money. And because of the word "MONEY" this is the reason why there's a conflict and because of money there's a possibility that the person can kill another person.

How can we improve our society, nation, and world if there's no peace?
Are all people here in the world have the human right? Peace in their heart, home, and nation? We will treat each individual equally so that there's a peace in this world. Peace is more important than justice, and peace was not made for the sake of justice, but for the sake of peace. If you can understand what others do, so there's a great peace in this world. You can choose to be peaceful right here and now. Peace is a choice and it has nothing to do with what other people do or think.

Peace will be but an empty-sounding word unless it founded on the order, which is founded on truth, built according to justice, vivified and integrated by charity, and put into practice In freedom.
