Universidad de Zamboanga
Zamboanga City

Why do people need to the human rights? Is it important? Why? Is it really helpful to us as a human being? Let's find out based on my opinion. For me, it is very important to have it because god didn't create man without purpose. It is important to express our concern even an issue that affects us so that it could be properly addressed. In case the government remains draft to the concern of the people. They should remain vigilant by making their voices heard the people want to transform the present condition into a just and humane one.

What is your right? Civil rights are personal and property rights of person that are recognized by the government these are right of equality. Rights of life, liberty and security of person, right of freedom, political rights, labor rights and social rights.
