People get their resources in both natural and artificial way. And because of the abusive works of the people, they tend to create disasters and damage to our environment. Some solutions are discovered but because of no-discipline among the people, this is just a useless plan.

There are some tips on how to control the ways to clean our environment. Clean our surrounding frequently by putting the trash or garbage in the proper disposal. Recycled the un used bottles and plastics for environment friendly. Don't burn rubber or any materials that may irritate in the health of the people. Those are some helpful ways, but there is another way within yourself to help the distracted environment.
