### **“World Peace”**

Despite of all differences of people here on earth I must say that they have different perspectives, concept and cultures regarding life itself. By their basic means of living, life itself can be a tremendous source of misunderstanding on how to prove to everybody of how they will fight for their own prerogatives in life.

Feeling, world peace is somewhat a problem since now and then. This problem occurs of different allied parties that which has never come to their mind on how to negotiate things in a right manner. These people argued with their rights and sometimes proving to everyone that they are the best and powerful among others. I think the major source of this problem is lack of communication that leads to misunderstanding both parties haven't given a chance to express their sides with a certain issue. Sometimes people we tend to regret other opinion and just let our own choices to be done. Ended, it's a matter of insight thoughts to be proud and to be accepted by others. Power and government are another source why we experience this kind of issue providing to others that they are on top, like some other nations they try to handle things as if they don't need others cooperation that leads to misunderstanding again. Giving importance what others might say is big considerations to everybody do that it will not be set aside.

Living in peace with others is a gift to God that will benefit not only for us but also for our family, nation and the entire world. We should exercise these attitudes so that at the end of the day we will still see the bright morning gift of God.
