“How to save the environment “

Saving the environment is very important because without these, all living organism will be affected. So it is our major responsibility as an individual to save the environment. Because if these will be destroyed, the most generation don't have a chance to see heavenly the mother earth any more.

There are many ways on how to save the environment. Such ways are: unplugging the appliances when not on use these help us to save electricity mother earth as well, recycling the recyclable materials is able one way to save environment so that it will not contribute more to pollution, throwing trash or garbage in a right place is able way to save environment.
