"World Peace"

As we all know peace can only begin within ourselves. We cannot find peace to others if in ourselves is not at peace. To have peace is to avoid conflict or trouble to other people. Many people engaged in the activities that will cause trouble and we do not know why people engage in those activities, maybe they enjoy doing it or there is reason behind. Even though there are people in the authority assigned to maintain the peace and order but sometimes they cannot maintain the peace and order, we can and hear trouble or war in some places.

Peace is very difficult to achieve here in our country, one of the main cause I guess is poverty that may lead to violence because of poverty. People will become desperate to harm others or may even engaged in illegal activities just to get money. Problem in term of achieving peace is not just here in our country but all through out the world. People should work hard for their own good and be content with what they have to prevent trouble. And in this case we can avoid conflict and we can promote peace to other people to the community, country and to the whole wide world.
