“How to save the Earth”

To save the earth we need to be careful with our environment by reducing, reuse and recycle make it a habit to reduce the things we need or we consume. Purchase only things that we only need and eat what you can, and always maintain our environment clean because it also help to protect our health and by doing that lets avoid throwing a garbage anywhere.

And we can also protect our environment to avoid the cutting of the trees because if we cut the trees in case the rain is very strong it may cost a landslide, and by doing that we can save our earth.
